CSIT884 Web Development

Week 13 Exercise – Local Storage

Please submit the **zip file containing the source code** to the entry named "Week 13 Exercise – Local Storage (Optional)" on Moodle before **19:00 Sunday, Week 13**. This exercise is optional.

Q1. Create a web page for JSON validation. The user can enter JSON text in a text area and the application can check whether the user input is a valid JSON or not.

Here is an example of a valid JSON:

Here is an example of invalid JSON:
